List of Figures	v
List of Tables	vi
List of Exhibit	ix
Acknowledgement	x
Executive Summary	xii
Chapter 1 Introduction	1
Chapter 2 The Conceptual Framework	6
Research Questions	6
Three Causal Models	9
Chapter 3 Research Design	15
Operationalization of Variables	15
Pre-testing and Improvement of Instruments	21
Chapter 4 Field Research and Instrumentation	30
Sample Design	30
Field Research Methodology	33
Construction of Relevant Scales and Indices	35
Organization of Indices into Concepts of Variables	36
Convergence Methods	41
Reliability and Validity	42

Chapter 5	Findings: Micro Organizational Analysis	48
	Indices of Organizational Structure and Processes	49
	Comparison with Benchmark	52
	Consistency between Factor Patterns and Organizational Design Indices	55
	Organizational Design Indices Among Different Work Units	58
	Cross Tabulation by Location and Type of Work Units	60
	Cross Tabulations of Factor Results	65
	Patterns of Interrelationships Among Various Variables	69
	Performance and Prior Variables	79
	Testing the Causal Model of the Organizational Design Indices	82
	Summary of the Chapter	89
<hr/>		
Chapter 6	Findings: Job Design, Individual Motivation and Satisfaction	92
	Comparison With Other Results	92
	Work Culture in NIA as depicted by Basic Statistics	94
	Job Design Indices and Work Unit Characteristics	102
	Location of Units	102
	Organization Type	105
	Ranks of Respondents	109
	Nature of Job	112
	The Summary and Questions Raised	116
	Patterns of Relationships among Job Design Indices	118
	Causal Models of Job Design Indices: Unit-wise Regression Analysis	122
	Questions Raised and Implications	126
<hr/>		

Chapter 7	Organizational and Environmental Variables and Micro Unit Performance	128
	Administrative Development	129
	The Background and Setting	130
	Introduction of Performance Oriented Approach	131
	Statement of the Problem	134
	Characteristics of Performance Study Units	136
	Structure Variables and Performance	140
	Organizational Variables and Performance	142
	Inter Unit Relationship and Organizational Performance	147
	Problems and Dysfunctions of Performance Measures	149
	Conclusion	152
<hr/>		
Chapter 8	Macro Perspective of Organizational Process	153
	Development of the National Irrigation Administration in the Philippines	153
	Evolution of New Financial Responsibility	155
	Domain of Business and Strategic Planning	157
	Emerging Domains of Business	158
	Strategic Corporate Planning in NIA	160
	Corporate Performance	162
	Viability, Accountability and Strategic Domain	172
<hr/>		
Chapter 9	Emerging Patterns and Conclusions	177
	Accountability and Strategic Domain	177
	Functions and Dysfunctions of Performance Measures	181
	Work Culture and Organizational Dynamics	186
	Preferences, Motivation and Alienation	186
	Authority and Participation in the Work Culture of NIA	188
	System Management and Total Approach	194
<hr/>		
References	200
Appendix A	Field Research Methodology	A-1
Appendix B	The Test of Consistency between Organizational Design Indices and Factor Analysis	B-1
Appendix C	Basic Statistic of Organizational Design Indices and Question Items, National Irrigation Administration, Philippines	C-1

Appendix D	Financial Performance Indicators	D-1
Appendix E	Operating Ratios for the Years 1980-1989	E-1
Appendix F	Questionnaires	F-1

List of Figures

Figure 2.1	A macro model of management behaviour and performance in irrigation organizations	9
Figure 2.2	Micro management model	12
Figure 2.3	Individual level job design model	13
Figure 5.1	Causal order of variable groupings	71
Figure 5.2	Diagrammatic presentations of zero-order correlations among selected indices	83
Figure 9.1	Value chain of National Irrigation Systems in the Philippines	197

List of Tables

Table 3.1	Indices in organizational unit design	16
Table 3.2	Job design indices	19
Table 3.3	Characteristics of pretest sample	24
Table 4.1	Number of work units classified by different types of work units and by location	32
Table 4.2	Characteristics of sample selected	33
Table 4.3	Number of questionnaires collected in each category national irrigation administration, the philippines	35
Table 4.4	Basic variables and component indices in organization design indices	38
Table 4.5	Basic variables and component indices in job design	40
Table 4.6	Reliability test of organizational design indices	44
Table 4.7	Reliability index for job design indices	46
Table 5.1	Means and standard deviations of organizational design indices in National Irrigation Administration, Philippines.	50
Table 5.2	Comparative results of organization design indices in the National Irrigation Administration and previous OAI studies	53
Table 5.3	Comparison between factors identified and original organizational design indices	56
Table 5.4	Organizational design characteristics by location of offices	60
Table 5.5	Organizational characteristics by type of work unit	62
Table 5.6	Organizational factors by location of offices and units	66
Table 5.7	Organizational factors by type of work units	68

Table 5.8	Inter correlations between indices in organizational design categories by variable groupings	73
Table 5.9	Number of inter correlations observed in both inside and outside each groupings	78
Table 5.10	Zero order inter correlations between perceived unit performance and independent variables	81
Table 5.11	Analysis of R^2 effects in the hierarchical multiple regression of organizational design indices	84
Table 5.12	B coefficient of hierarchical multiple regression on selected organizational indices	86
Table 6.1	Comparison of results of job design indices with those of previous researches	93
Table 6.2	Basic statistics of job design indices and question items National Irrigation Administration, the Philippines	95
Table 6.3	Job design indices as scores cross classified by region and central office	103
Table 6.4	Job design indices cross classified by type of organization - National Irrigation Administration, the Philippines	106
Table 6.5	Job design indices by rank of the jobs - National Irrigation Administration, the Philippines	110
Table 6.6	Job design indices by nature of job - National Irrigation Administration, the Philippines	113
Table 6.7	Inter correlation between job design indices	119
Table 6.8	Regression analysis of job design indices of work units	124
Table 6.9	Regression analysis of job design indices and work motivation in work units	125
Table 7.1	Characteristics of the sample irrigation systems as at end 1989	137

Table 7.2	Relative performance of three regions with regard to financial viability index for the last five years	139
Table 7.3	Results of step-wise regression of organizational and job design indices on viability index	144
Table 7.5	Index of intensity of interaction with external units by region (Shown as percent of total interunit interactions)	148
Table 7.6	Index of intensity of interaction with external units by region and by system type (Shown as per cent of total interunit interactions)	148
Table 8.1	Targets in various versions of the corporate plan	162
Table 8.2	A comparison between incremental area (1980-89) and the new area constructed under the plan	163
Table 8.3	The total organizational performance ratios	164
Table 8.4	A comparison of operating expenses and income for the years 1985-1989 (in thousand pesos)	167
Table 8.5	A comparison of operating ratios for the years 1980-1989	169
Table 8.6	A comparison of financial performance indicators for the years (1985-1989)	170
