**Table of contents:**

			<i>Pages</i>
1	<b>WIJESEKERA S. &amp; REY J.</b>	Use of a simulation model as part of a management information system to improve the operations on ar irrigation in southern Sri Lanka.	<u>1 to 24</u>
2	<b>MANGUERRA H.B., CHUENCHOOKLIN S. &amp; LOOF R.</b>	Implementing SYMO in Phitsanulok irrigation System, Thailand.	<u>25 to 40</u>
3	<b>SCHUURMANS W. &amp; VAN DER KROGT W.N.M.</b>	Experiences with management support models in Egypt and Indonesia.	<u>41 to 54</u>
4	<b>MANZANERA M., QUERNER E., CIANCAGLINI N.C.</b>	Utilization of SIMWAT model in an irrigated area of Mendoza, Argentina.	<u>55 to 66</u>
5	<b>VOLKAN F. &amp; VORON B.</b>	Improvement of the regulation techniques for the main canals: the example of the Harran main canal.	<u>67 to 80</u>
6	<b>KOSUTH P.</b>	Use of a simulation model to improve operation of dam- river systems for irrigation purpose: elements for a methodology.	<u>81 to 90</u>
7	<b>BAUME J.P. &amp; MALATERRE P.O.</b>	Design of a decision support tool to improve manual operation procedures of an irrigation canal: application to the Kirindi Oya Right Bank main Canal, in Sri Lanka.	<u>91 to 100</u>
8	<b>MANZ D.H. &amp; SCHAALJE</b>	Development and Application of the Irrigation Conveyance Systems Simulation Model.	<u>101 to 120</u>
9	<b>HATCHO N. &amp; SAGARDOY J.</b>	CIMIS (Computerized irrigation management information system).	<u>121 to 130</u>
10	<b>ZAIGHAM HABIB &amp; BAGH ALI SHAHID</b>	The utility of a simulation model for Pakistan Canal Systems: Application examples from North West Frontier Province of Punjab.	<u>131 to 150</u>
11	<b>VORON B.</b>	Conversion of an old canal regulation system for a new water use method.	<u>151 to 172</u>
12	<b>DE LEON MOJARRO B., KOSUTH P. &amp; ARGUETA J.</b>	Use of the SIC simulation model to improve the management of an irrigation canal in La Begonia, Guanahuato, Mexico.	<u>173 to 188</u>
13	<b>HURAND P.</b>	Use of rivers for irrigation water conveyance.	<u>189 to 198</u>
14	<b>SAUVAGERE J.P.</b>	The BIVAL Canal Control System: application to the sahel Canal operated by the Office du Niger, Mali.	<u>199 to 212</u>
15	<b>SKERTCHLY M.L. &amp; VALLES S.M.</b>	Simulation Model used in a real irrigation canal: the case of Canal Alto, Mexico. (Abstract only)	<u>213 to 214</u>
16	<b>GOMATHINAYAGAM P., PUNDARIKANTHAN N.V. &amp; al</b>	Simulation in irrigation management: the Thamiravaruni river system, a case study in India.	<u>215 to 222</u>
17	<b>ZHOU ZHENMIN</b>	Optimization of water allocation in canal systems of ChenGai Irrigation area.	<u>223 to 230</u>
18	<b>CLEMMENS A.J., SLOAN G. &amp; BETCHER B.</b>	Canal control challenge.	<u>231 to 240</u>
19	<b>SCHAALJE &amp; MANZ D.H.</b>	Use of the ICSS Model for the evaluation of automatic controllers for the regulation of irrigation canals.	<u>241 to 254</u>
20	<b>CHEVEREAU G. &amp; LEMOINE B.</b>	Open loop control in irrigation network.	<u>255 to 270</u>
21	<b>DELTOUR J.L.</b>	Simplified computer simulation applied to irrigation canal operation.	<u>271 to 284</u>
22	<b>SCHUURMANS J.</b>	Improved real-time control of water deliveries through decoupling.	<u>285 to 296</u>
23	<b>ZIHUI LIN &amp; MANZ D.H.</b>	Optimal operation of irrigation canal systems using nonlinear programming - dynamic simulation model.	<u>297 to 306</u>
24	<b>MONEM M.J. &amp; SCHUURMANS W.</b>	Performance of canal delivery strategies and control systems.	<u>307 to 316</u>

25	<b>MOHAN REDDY J.</b>	Decentralized constant-volume control of irrigation canals.	<u>317 to 328</u>
26	<b>PARRISH J. &amp; HOLLY F. M. Jr.</b>	CanalCAD - Dynamic flow simulation in irrigation canals with automatic gate control.	<u>329 to 335</u>
